What's New in Atlanta Neuroscience

Featuring:

-  Malu Muragan, Assistant Professor, Emory University,
"Social reward in the brain"
-  Doby Rahnev, Assistant Professor, Georgia Tech,
"The computational and neural bases of metacognition"
-  Aaron Roseberry, Associate Professor, Georgia State University,
"Do I need to eat or do I want to eat? Dopamine circuits in the control of feeding and body weight"
-  Matt Rowan, Assistant Professor, Emory University,
"Novel cell-type specific approaches to slow neurodegeneration during aging"
-  Stacey Dutton, Assistant Professor, Agnes Scott College,
"Epilepsy and sexual behavior"
-  Tim Sampson, Assistant Professor, Emory University,
"The impact of gut microbes on amyloid diseases"
-  Jessica Bolton, Assistant Professor, Georgia State University,
"The role of microglia during brain development in shaping future mental health"
-  Jason DeBruyne, Associate Professor, Morehouse School of Medicine,
"What can 'Little Angels' tell us about sleep?"
-  Jennifer Stevens, Assistant Professor, Emory University,
"Neuroimaging biomarkers of stress vulnerability"
